

NICE BRIDGE APPROACH IMPROVEMENT PROJECT

The 18-month Nice Bridge Approach Improvement Project includes:

- Paving and making other improvements in both directions for a smoother ride and improved traffic flow through the toll-plaza area
- Replacing and upgrading tollbooths and safety features at the toll plaza

Construction began in November 2008 and will necessitate temporary closures to travel lanes, toll lanes or shoulders:

- From 9 a.m. to 3 p.m. and from 8 p.m. to 5 a.m. – Monday through Friday. Traffic will be maintained in both directions.
- No lane closures will be permitted the day prior to, the day of, or the day after, a major holiday
- During construction, crews may periodically perform flagging operations to direct traffic through the open lanes
- Wide-load restrictions may be in effect during construction hours. Drivers of wide-load vehicles should wait for police escort at the One Stop Auto Truck Plaza. Additional information will be listed on the permit issued by the State Highway Administration.

The Authority will make every effort to minimize inconvenience to its customers and encourages drivers to use caution while traveling.

Thank you for your patience.
