

SOUTHBOUND I-95

Fort McHenry Tunnel Driver's Update

Starting **January 15**, weather permitting, two highway speed lanes and two lanes through the toll plaza will be open for motorists traveling I-95 southbound at the Fort McHenry Tunnel.

- All motorists must obey the posted speed limits for the lane of travel.
- Motorists traveling in the left two lanes through the toll plaza will use the southbound left tube (Bore 2).
- Commercial vehicles and motorists using Exit 55/Key Highway should stay right and use the southbound right tube (Bore 1).
- Motorists entering southbound I-95 from Keith Avenue should use caution when merging with oncoming traffic.
- Tolling remains in effect.
- Northbound traffic shift and toll gantry activation is anticipated to occur late January – early February, weather permitting.
- Always properly mount your *E-ZPass* transponder and keep your account up to date to receive the lowest toll rate.

- Southbound tolls will be collected via new overhead electronic toll gantry just before the tunnel bore.
- With gantry activation, toll feedback displays in former plaza are deactivated.
- Stay alert and adhere to overhead lane-use signals.
