

I-95 ETL NORTHBOUND EXTENSION

UPDATE: MD 24 Interchange/ Two-Lane ETL Extension

JULY 2025

As part of the Maryland Transportation Authority's (MDTA) \$1.1 billion program to relieve congestion and improve travel along the I-95 Corridor into Harford County, the MDTA is reconstructing the interchange at I-95 and MD 24 (Vietnam Veterans Memorial Highway) to accommodate the future northbound I-95 Express Toll Lanes (ETL).

The Maryland Transportation Authority (MDTA) will be extending the Express Toll Lanes (ETL) along northbound I-95 between MD 43 and MD 24, completing more than 10 miles of improvements. These important traffic-relief initiatives will benefit Marylanders throughout the Baltimore region by giving drivers a safer and more efficient commute. The I-95 ETL north of Baltimore have been very successful, and we are pleased to be able to deliver even more traffic relief.

In addition to the I-95 northbound roadway improvements, the MDTA will replace multiple bridges that are more than 50 years old and provide several new noise walls. The I-95 ETL Northbound Extension Program will be completed in multiple segments.

Project Accomplishments

About Construction

Work associated with this project has started and is anticipated to be completed by fall of 2027. All I-95 travel lanes and all traffic operations on MD 24 will be maintained during peak-traffic periods; however, some travel lanes will be closed during off-peak periods. Drivers should use caution and obey the posted speed limits within the construction zone and are encouraged to sign up for email alerts of traffic advisories and notices.

The MD 24 interchange reconfiguration requires changes to existing traffic patterns that include the removal, relocation, or addition of ramps resulting in new ways drivers will access I-95, MD 24, and MD 924.

Construction of the first ramp of the reconfigured interchange is anticipated to be completed shortly and open to traffic by the end of summer 2025. Vehicles on southbound I-95 traveling to MD 924 will be transferred to the new off-ramp that follows a similar alignment to the existing off-ramp.

There will be some impacts to traffic as crews work to finalize the transition from the existing ramp to the new ramp. The MDTA will notify the public in advance via traffic alerts posted on the website and through social media.
