

I-95 Express Toll Lanes Northbound Extension

Traffic Advisory Spring 2024

Work to Begin on MD 24 Northbound Auxiliary Lane March 25

Beginning March 25, 2024, weather permitting, work will begin on the construction of an auxiliary lane in the northbound direction on MD 24 in Harford County. The project will add a third auxiliary lane on northbound MD 24 from MD 924 through the Singer Road intersection, improving capacity and safety along the corridor while reducing congestion for vehicles traveling from I-95 toward Bel Air. As part of the project, northbound travel lanes will be resurfaced, and traffic signal modifications will be made at the Singer Road intersection. Noise walls will be installed along sections of the project area.

Construction will primarily occur within the existing median of MD 24 with work occasionally taking place in the shoulder areas. Temporary, off-peak lane closures and minor traffic shifts can be expected throughout the duration of the project until its completion in fall 2025.

The MD 24 northbound roadway improvements are part of the I-95 Express Toll Lanes (ETL) Northbound Extension project, which will be completed in segments and is expected to open through MD 152 in 2024, and through MD 24 in 2027. For more information, go to mdta.Maryland.gov/I95ETLNB/home.html

SIGN UP FOR ALERTS FOR CONSTRUCTION
