

I-95 ETL NORTHBOUND EXTENSION PROGRAM

TRAFFIC ALERT

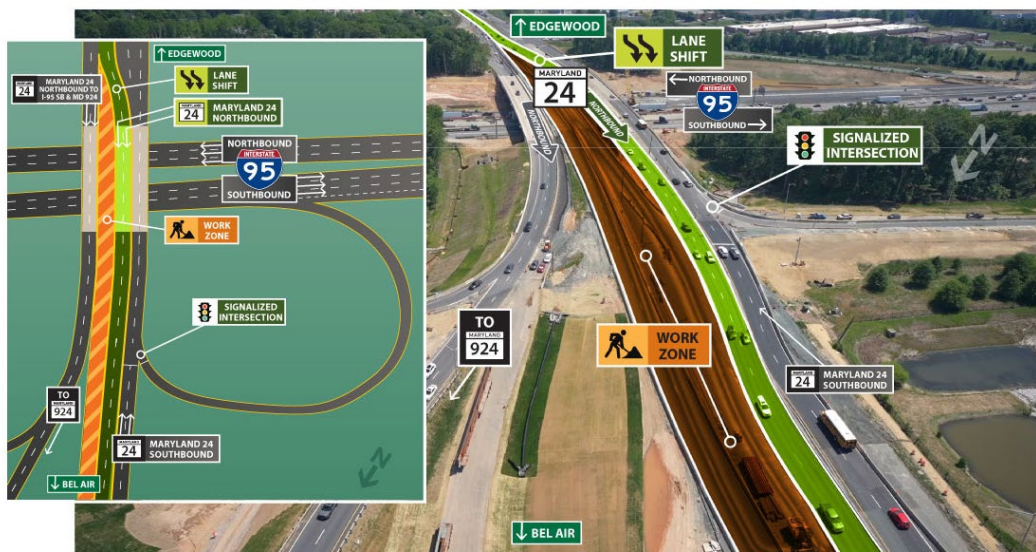

NEW TRAFFIC PATTERN ON MD 24 BRIDGE OVER I-95

Baltimore (September 3, 2026) Beginning Thursday, September 10, 2026, the Maryland Transportation Authority (MDTA) will implement a new traffic pattern on the MD 24 bridge over I-95. Under the new configuration, the two northbound MD 24 lanes toward Bel Air will shift left onto the newly constructed bridge span.

A barrier wall will separate northbound and southbound traffic.

An overnight lane closure and traffic drags may occur on northbound MD 24 on Wednesday, September 9, as crews prepare for the shift. Portable message signs are in place to alert motorists of the new traffic pattern. Dates and times are subject to change due to weather or other factors.

With northbound traffic operating on the new bridge span, **crews will continue to work behind barrier walls** to demolish the existing MD 24 bridge to make room for the northbound I-95 Express Toll Lanes (ETL).

The MDTA appreciates motorists' patience and reminds drivers to slow down, use caution, and stay alert while traveling through work zones.

The Work is part of the MDTA's I-95 ETL Northbound Extension Program between MD 43 and north of MD 24, which will help reduce delays and improve travel along northbound I-95 between Baltimore and Harford counties.
