

Nice/Middleton Bridge (Southbound US 301) Driver's Update

Starting in March 2022, two-way traffic will operate on northbound US 301 so crews can remove the existing toll plaza. Access to the *E-ZPass* Maryland Customer Service Center (CSC) will be from Orland Park Road until the new bridge opens.

- Southbound shoulders will be closed through the project work area.
- Stay alert, obey posted speeds and keep moving through the work area.
- Traffic delays are possible throughout the work area.
- Tolls will be collected via a new overhead electronic toll gantry located prior to the existing toll plaza structure for southbound traffic only.
- Always properly mount your *E-ZPass* transponder and keep your account up to date to receive the lowest toll rate.
- All-electronic tolling is statewide.
